

Partners for
Environmental Progress
(PEP) is a coalition of business
and education leaders who share the
vision of applying science-based environmental best
practices to business and community issues. PEP was
founded in 2000 on the guiding principle of promoting
business growth while preserving the environment
and overall quality of life along the Gulf Coast.

Our 200+ members are concerned businesses and organizations—both large and small— who value our unique natural resources and our economy. We understand that the future of our area depends on ensuring a balance between business development and job creation, industrial growth and a healthy environment.

PEP promotes a balanced view of business and industry contributions to this area by providing factual information about safety and environmental performance. Through community involvement and this conciliatory approach, we strive to build a resilient Gulf Coast.

PEP Board of Directors at the 13th Annual PEP Environmental Stewardship Award Ceremony

About PEP

BENEFITS OF PEP MEMBERSHIP

AS A MEMBER OF PEP YOU WILL:

Be informed about timely issues affecting the environment and business along the Gulf Coast. Empower PEP to tell the community and your employees about your innovative environmental best practices and success stories.

Receive updates on projects at local industrial sites and member company news and events. Be represented by our organization during community discussions about topics important to industry and business.

PEP hosts events that bring together members and other community leaders to network and to share knowledge, resources and good times.

- Membership Breakfasts and Lunch & Learns
- Annual Golf Tournament
- Reverse Trade Show
- Annual Meeting
- Environment Awards

OUR CORE BELIEFS

Clean air and water are paramount to the health and prosperity of the Alabama/ Mississippi Gulf Coast area.

Information concerning environmental impact must be based on facts and sound scientific principles.

Business, industry, and the community must work together to continuously improve air and water quality in our area.

OUR MEMBERS

Our 200+ members come from a broad spectrum of companies, non-profits and organizations with a common purpose of promoting economic prosperity and environmental sustainability in the area. Our members represent the diversity of business and industry along the Gulf Coast.

PEP IN THE COMMUNITY

We partner with numerous area organizations to create a sustainable community: socially, economically and environmentally.

- Mobile Area Chamber of Commerce— Government Affairs and Energy Committees
- Mobile Bay National Estuary Program—Executive Committee
- Transportation Coalition
- Metropolitan Planning Organization— Citizens' Advisory Committee
- Mobile United—Natural Resources Committee
- Alabama Coastal Cleanup
- · Coastal Kids Quiz

CREATING INNOVATIVE PROGRAMS

One of PEP's most successful ventures is By-Product Synergy Central Gulf Coast (BPS). The program works to find matches between the byproducts that area industrial plants dispose of and those companies that need that raw material.

By sharing by-products, best practices and experience, BPS has saved participating companies millions of dollars a year. Plus, it has kept thousands of tons of materials from landfills and other disposal sites, and significantly reduced carbon dioxide emissions into the atmosphere. These accomplishments have earned the innovative program an award from the EPA.

We work daily to protect our environment through quality business practices with a moral component. If that is true for your business, then you should be a member of PEP."

— Tom Bramlett, President, OEC

We meet and often exceed environmental regulations, but the community may not always know that. Being active in PEP helps us communicate our beliefs and principles—and our efforts to support the environment—both to our employees and the community."

> — Bonnie Tully, VP & Site Manager, **Evonik Corporation**
