

Geosyntec Stop-Gap Compliance Services

Helping you navigate uncharted waters
with limited staffing

The global COVID-19 pandemic has affected so many aspects of our businesses and communities. Meanwhile, reporting season is quickly approaching, and while EPA has taken steps to provide enforcement discretion ([see link here](#)), many states may not make allowances for lapses in compliance, reporting delays, and missed deadlines.

Geosyntec is here to help. We can support your efforts to maintain operational continuity while mitigating environmental liabilities. Geosyntec practitioners stand ready to support you either at your site or from remote locations. Our well-established remote work capabilities and best practices enable us to operate efficiently regardless of our work location.

Whether you are expanding your operations to meet increasing market demands, retooling operations to address changing market needs or supply chain disruptions, or operating with limited staffing, our team is here for you. Many of our environmental management practitioners served as EHS professionals in manufacturing operations prior to becoming consultants.

While you continue to keep your focus on addressing COVID-19 concerns for your operations, you can trust Geosyntec to provide additional EHS support when you need it most.

For more information, please contact:

Jess Black at jblack@geosyntec.com or (312) 416-3922
Jane Besch at jbesch@geosyntec.com or (801) 853-8302
Kate Graf at kgraf@geosyntec.com or (267) 419-3013
