

7th Annual PEP Reverse Trade Show Education Seminar

Reducing Carbon Footprints: Case Studies on Zero Waste and Sequestration

October 20, 2022
9:00 a.m. -11:15
Ft Whiting Auditorium

AGENDA

Welcome Jennifer Denson, PEP Executive Director

Sponsor Spotlight Guy Etherton, First onsite

Introduction of Topic and Speakers – Steve Stewart, SCS Engineers, Treasurer/PEP Board of Directors

Journey to Sustainability at Airbus

Speaker: Jason Brasfield, Sustainability and Environmental Manager, Airbus

Jason will discuss Airbus's current path to Zero Waste Certification the TRUE program and their roadmap to sustainability.

5 Minute Break

Carbon Sequestration: The Road Ahead

Speaker: Stephanie Hill, Program Lead, SCS Engineers

Stephanie will discuss current and future opportunities to reduce GHG emissions through carbon sequestration and deep well injections.

Sustainability in Stainless

Speaker: Wayne Denton, EHS Manager, Outokumpu

Wayne will share Outokumpu's sustainability initiatives and share some closing thoughts.

11:15 Conclusion ** Pick up CEU certificates

Speaker Bio's

Jason Brasfield, Airbus

Jason Brasfield serves as the Sustainability and Environmental Manager for the Airbus U.S. Manufacturing Facility located in Mobile, Alabama. In this role he is responsible for the implementation of the sustainability goals and the overall environmental management of the growing site. He joined Airbus in 2019 after serving 14 years in environmental education and industry support at the University of Alabama. In that role he assisted small business with environmental compliance and established training programs centered on ISO14001.

Other aspects of Jason's environmental career include laboratory analysis, real estate due diligence, as well as soil and groundwater remediation while working as a consultant out of the Birmingham, Alabama area. Jason holds a bachelor's degree from the University of Alabama and a Master of Science in Environmental Management through Samford University.

Stephanie Hill, SCS Engineers

Stephanie Hill is a program leader for SCS Engineers' Carbon Sequestration and Deep Well Injection practice, hydrogeologist, and licensed Professional Geologist. She earned a BS in Geosciences with an emphasis in hydrogeology and geomorphology at the University of Texas in Austin. Stephanie's early career focused on environmental compliance for mineral and fossil fuel industries at the Texas Commission on Environmental Quality (1996 to 2000) and the Railroad Commission of Texas (2000 to 2012). Since joining SCS Engineers in 2013, she co-leads a team of geoscientists and engineers to advise clients of various industries on geologic storage options for carbon reduction and disposal of industrial wastewaters.

Wayne Denton, Outokumpu
